

Youth Involvement Policy Excerpt

No one under the age of 16 is allowed on a construction site while construction is going on. Further, no one under the age of 18 is allowed to do any ultra-hazardous activities, which include the use of power tools or motor vehicles, demolition, roofing or working from a height of 6 feet or more.

If we do have 14- and 15-year-olds painting or landscaping at a Habitat house, we will schedule these groups for days when no active construction is going on at the site.
